## Speedway Uses Jet Dryer for 1st Time in 2008!

For the first time at La Crosse Fairgrounds Speedway, on October 5th, a Jet Dryer was used to speed up drying time for a race event. Iowa Speedway in Newton, IA was kind enough to put together a plan with the La Crosse Speedway to have a Jet Dryer on Stand-By if needed. It was delivered and put to use on Sunday morning during the annual 4-H Charity Pancake Breakfast. "The use of the Jet Dryer cut the track drying time nearly in half, and was extremely useful on an overcast cool damp day" commented Speedway director of Competition Ray Loughan. "Thank you to Iowa Speedway for their help" concluded Loughan. For more information about the Iowa Speedway and its schedule of events, please visit
